Help

Tags control which type of jobs a runner can handle. By tagging a runner, you make sure runners only handle the jobs they are equipped to run. Learn more.

Project runners

These runners are assigned to this project.

New project runner

Assigned project runners

⚠ #33473060 (PzCwsjZr4)

✏ ⏸ **Remove runner**

test

test

Instance runners

These runners are available to all groups and projects.

Each CI/CD job runs on a separate, isolated virtual machine.

Enable instance runners for this project

Available instance runners: 82

📢 We encourage project owners to keep the setting that limits CI/CD job token access to your project enabled at all times. Enabling this setting prevents job tokens from pipelines created by your maintainers in other projects from accessing your project's resources, unless explicitly added to an allowlist.

Pages

With GitLab Pages you can host your static website directly from your GitLab repository. Learn more.

☑ **Force HTTPS (requires valid certificates)**

When enabled, all attempts to visit your website through HTTP are automatically redirected to HTTPS using a response with status code 301. Requires a valid certificate for all domains. Learn more.

☑ **Use unique domain**

When enabled, a unique domain is generated to access pages.

Save changes

Access pages

https://ci-cd-2024-07-03-olgasuslova1-9756558b512213e47904726dccdaf3650.gitlab.io ↗

Access Control is enabled for this Pages website; only authorized users will be able to access it. To make your website publicly available, navigate to your project's **Settings > General > Visibility** and select **Everyone** in pages section. Read the documentation for more
